Practice - 1 (Basics of C++)

Questions

1. helloworld
2. Display our name
3. User input
4. Sum of two number
5. Swap two number
6. Size of int float and double
7. Float Multiplication
8. ASCII value of character.
9. Fahrenheit to celcious
10. Calculate simple interest
11. Calculate compound interest
12. Calculate perimeter of rectangle.

Ans1

```
# include <iostream>
using namespace std;
int main(){
    cout << "hellowworld" << endl;
    return 0;
}.
```

Ans2

```
cout << " name" << endl;
```

Ans3

```
# include <iostream>
using namespace std;
int main(){
    int age;
    cout << "what is your age";
    cin >> age;
    cout << "your age is " << age;

    return 0;
}.
```

(10)
```
float p, r, t, si;
cout << " Principle amount :";
cin >> p;
cout << " time : ";
cin >> t;
cout << " rate of interest : ";
cin >> r;
si = (p*p*t) / 100;
cout << "simple interest : " << si << endl;
return 0;
}.
```

(11)
```
double p, r, t, amount, ci;
cout << "Principle amount : ";
cin >> p;
cout << " Time (in y) : ";
cin >> t;
cout << " Annual interest rate : ";
cin >> r;
amount = p* pow( (1+r/100) , t);
ci = amount - p;

cout << "Compound Interest : " << ci << endl;
cout << "Total Amount : " << amount << endl;

return 0;

}.
```

(12)
```
#include <iostream
using namespace std;
int main()
float x, y;
cin >> x >> y;
cout << "perimeter " << 2*(x+y) << endl;
return 0;
}.
```

```
cout << "size of int: " << sizeof(int type) << "bytes" << endl;
cout << "size of float:" << sizeof(float type) << "bytes" << endl;
cout << "size of char:" << sizeof(char type) << "bytes" << endl;
cout << "size of double:" << sizeof(double type) << "bytes" << endl;
return 0;
}.
```

(7)

```
float x, y;
cout << "Enter 2 num: " << endl;
cin >> x >> y;
cout << "x x y = " << x*y << endl;
return 0;
}.
```

(8) ASCII values of character

```
#include<iostream>
using namespace std;
int main()
char x;
cout << " character: " << endl;
cin >> x;
cout << "ASCII value of " << x << " is " << int(x)
<< endl;
return 0;
}.
```

(9)

```
float temp, celsious;
cout << "temp in farenheit:" << endl;
cin >> "temp in celsious:" << celsious << endl
return 0;
}
```

(4) Sum

```
# includ <iostream>
using name space std;
int main ()
{
    int x,y ;
    Cout << "input x and y ";
    Cin >> x >> y ;
    Cout << "sum " << x+y;

    return 0 ;
}.
```

(5) Swap

```
# indue < iostream>
using namespace std ;
int main()
{
  int x, y, temp ;
  Cin >> x >> y;
  Cout << "x=" << x << ende << "y=" << y ;
  temp = x ;
  x = y ;
  y = x ;
  Cout << "after swapping " << ende.
  Cout << "x = " << x << ende << "y=" << y.

  return 0;

}.
```

(6)

```
# include <iostream>
using name space std;
int main ()
{
  int inttype;
  float floattype;
  char chartype;
  double doubletype;
```
